Business Boom: Document Management Eases Your Increased Workload

4/21 2:15pm-2:30pm EDT

Manufacturers and Distributors alike have experienced a rapid increase in business while the pandemic has made our workforce less reliable than ever. Staff may suddenly be remote or absent for extended periods – but the show must go on! Embracing tools that improve productivity while supporting workforce flexibility is critical. Implementing a web-based document management system that includes process automation is one of the most cost-effective ways to improve productivity. Enabling remote workers keeps your business running while automating processes allows staff to focus on high value functions.

Join Enlighten.Net, Inc.'s Jerome Lavalley as he shares how automating your business-critical paper processes with web-based document management can help your company achieve:

- Workplace Flexibility
- Improved Productivity and Faster Processing
- Reduction in Manual Data Entry
- Improved Control of Business Documents
- Business Continuity
