Ready to connect.

Help protect workers at-height and your business with 3M™ DBI-SALA® Fall Protection and 3M™ Connected Safety.

Did you know?

Fall protection in construction is the #1 cited violation following OSHA inspections.

Accountability

Compliance

Verification

Your connection to simplified compliance.

Simplify your compliance tasks with 3M™ Safety & Inspection Manager from 3M™ Connected Safety. It can help reduce problems commonly associated with paper inspections, such as: knowing whether inspections are completed, getting visibility of the status of issues uncovered during inspections, and struggles with finding records when you need them. When you can access up-to-date Fall Protection inspection data, you're in control and ready to handle compliance challenges.

Accountability

- **Prevent Loss**
  Assign equipment to workers or work areas for accountability.

- **Enhance awareness**
 Quickly determine the compliance status of assigned equipment.

Compliance

- **Stay Up-to-Date**
  Notifications help ensure equipment inspections are up-to-date.

- **Unlimited Fall Protection Assets**

Verification

- **Track & Report**
  Stay on top of equipment inspection results and produce reports to document compliance.

- **Expand Your View**
  Get end-to-end visibility in resolving issues discovered during inspections.

Introducing the NEW Safety & Inspection Manager Fall Protection Package

Start your connected journey here. Manage your fall protection equipment from your phone with this new basic package, which allows you to:

- Administer annual and pre-use equipment inspections
- Receive notifications when inspections are coming due
- Configure 3M supplied checklists to meet your needs
- Check-in/check-out to workers and places
- View inventory
- Run reports to show trends and confirm compliance
- Get up and running quickly with online training available anytime.
- Easily integrate with pre-programmed DBI Sala RFID tags to get up and running quickly. Other fall protection equipment can be retrofitted with RFID tags or barcodes, available for purchase.
